

### Hygienic toilet seat S3000 with sensor

The Hygolet toilet seat S3000 is sensor-operated. Just a wave of the hand and the dry Hygoplast sleeve is pulled over the seat ring, while the previously used Hygoplast is slit and wound around a disposable core.

### Easy to install

The Hygolet seat can be installed on virtually any type of toilet bowl, and can replace an existing seat with ease.

The thin Hygoplast sleeve is moved forward by a motor-powered DC battery pack or is connected to a DC power supply.

Replacing the Hygoplast roll is as easy as changing a roll of toilet paper. Simply remove the old roll and snap in a fresh new one.

The Hygoplast roll is environmentally friendly. One roll lasts for up to 125 uses.

### Total hygiene

For 30 years, **hygolet®** has focused solely on designing and manufacturing innovative, quality restroom products, specially designed to create a lasting, positive impression on restroom visitors while reducing maintenance costs incurred by businesses.

# The Future of Cleanliness

The fear of public restrooms is common to us all, and justifiably so. The odors that assault our senses, littered floors, clogged toilets, bacteria and germs all contribute to our unease. Thankfully, with Hygolet's hygienic toilet seat, we can all feel more secure when using the public restroom. With its electronically-controlled revolutionary technology, the Hygolet toilet seat is the most effective and practical method of keeping a toilet seat permanently clean.

A hygienic solution that makes all the difference:  
**The Hygolet toilet seat.**

**S 3000**  
DIGITAL

Within seconds,  
a 100% hygienically clean  
dry toilet seat is ready for use by  
customers, patients and employees.  
Gone are the days of cumbersome  
cleaning efforts and expense  
to keep your toilet seat clean.

## Product

- ▶ Touch Free
- ▶ Extremely User Friendly
- ▶ High Comfort Level
- ▶ Reliable
- ▶ Handicap Accessible
- ▶ Unisex
- ▶ Modern Design
- ▶ CE Approved

## Clear Hygiene

The unique advantage of the Hygolet toilet seat is that each time you sit down, you have a perfectly hygienic seat ring. By activating the unit with a quick wave of the hand, the seat ring is covered each time with a new, clean, and hygienic hygoplast polyethylene sleeve. The clean hygoplast roll is housed on the left side of the unit. The used hygoplast is rolled onto a take-up spool and housed in a separate chamber on the right side of the unit allowing for a convenient disposable spool. This keeps the seat 100% clean each and every time.

## Reduce

- ▶ Labor costs associated with providing clean, sanitary, and litter-free restrooms.
- ▶ Plumbing costs due to clogged toilets.
- ▶ Waste and litter of paper products.
- ▶ Exposure to bacteria and germs.
- ▶ Exposure to slip and fall accidents and liability.
- ▶ Complaints about the restrooms.

## Increase

- ▶ Positive perception of your business.
- ▶ Awareness of management's attention to all details.
- ▶ A personal, hygienic toilet for each user.
- ▶ Customer and employee comfort.
- ▶ Time for your maintenance staff to spend elsewhere.
- ▶ A safer environment for restroom users.
- ▶ Optimal Hygiene Conditions.
