

Frequently Asked Questions

hygoFresh®

FEATURES

Q. What is *hygoFresh*?

A. *HygoFresh* is a metered aerosol dispenser designed to provide continuous and automatic odor control.

Q. What are the benefits of using *hygoFresh*?

A. HygoFresh provides automatic odor control by keeping an area smelling fresh and clean. Controlling odors improves business image.

Q. Does the *hygoFresh* refill can neutralize odors?

A. Yes. The *hygoFresh* refill can actually neutralizes odors and provides a pleasing fragrance

Q. How does it work?

A. The *hygoFresh* dispenser should be installed approximately 12 " below the ceiling. The system can be set to operate on a day, evening or 24 basis. Fragrance can be scheduled to dispense at 5- minute intervals, up to 25 minutes

Q. What makes *hygoFresh* better than other air freshening systems?

A. Unlike fan/gel/liquid/wick systems, *hygoFresh* is an automatic metered system designed to ensure around-the-clock, **consistent** odor control. You may have noticed that with the other systems, fragrance levels/odor control may begin to decrease after only two weeks. *HygoFresh* will work **consistently** for 30 days.

Q. How do I know it is working?

A. There is a red indicator light that will flash when unit is dispensing. A green light ensures batteries are working properly.

TECHNICAL

Q. How is the *hygoFresh* dispenser installed?

Each dispenser is delivered with two screws and anchors for easy installation.

Q. What type of batteries do I need?

A. Two D-cell batteries.

Q. How often do I have to change the batteries?

A. Approximately every 2 years.

Q. What is the VOC content of the *hygoFresh* refill can?

A. *Hygofresh* refill cans contain less than 30% total VOC content, one of the lowest in the industry.

Q. Does *hygoFresh* refill can leave behind a residue like other products?

A. No. HygoFresh refill cans have ultra-fine particles that leave no fallout or residue.

Q. How often does the *hygoFresh* refill can have to be changed?

A. That would depend on how the unit has been programmed. If unit is programmed to dispense every 15 minutes over 24 hours, it will last 30 days.
